

Test Script

Hi <subject name>!

As we have already mentioned, you will be testing a computer prototype today for a note taking and organization application. The point is to test the system and not you. Remember there are no right or wrong answers here. However, we would like to ask you to be as clear as possible in your answers. Feel free to express your thoughts while testing the application.

Before we start, we would like to ask you to fill out this questionnaire.

-- User fills out the pre-test questionnaire

--

Perfect, now we will give you a quick rundown on how to use our application.

-- Show the user documentation

--

Do you have any questions about the general functionalities of the application?

-- Answer the user's questions if required

--

You're ready to get you started! First, we will give you a quick run on the task that you will be performing today.

-- Read the task names--

Please, get yourself comfortable. We are about to begin test for the prototype. Now, please register yourself for our application.

--Perform registration
test--

--Record time spent in
registration--

--Record feedbacks and time
required--

That was great! Now, please login using the credential you have just created and navigate to the note taking section.

--Perform login
test--

--Perform navigation test
#1--

--Record
feedbacks--

What do you do if you have forgot your login credentials?

--Record
feedbacks--

Do you have any questions so far? No? Perfect, please upload the Lorem Ipsum 1 file from the MyFiles menu. We will ask you to perform some editorial tasks on the uploaded text. Please delete the last paragraph, convert the 3rd paragraph to bullet points, convert the 1st sentence to an underlined title and highlight every

instance of the word “Ipsum”. The goal of this test is figure out whether or not the user interface is friendly.

--Perform editorial
test--

--Record feedbacks and time
required--

To compare the efficacy of the note taking system we will administer two fun quizzes on countries. I will read a short text on the country of Swaziland and you will take notes with a pencil and paper then I will read a short text on the country of Bhutan and you will take notes using the application. You don't have to write down everything, just what you deem important.

--Read Country quiz
text of Swaziland and
Bhutan--

Great, now we will give you two quizzes, one on Swaziland and one on Bhutan. You may use the notes you took to answer the respective quiz.

--Perform Country
Quiz 1 and 2 with notes
the user took--

--Record answers and calculate grade--

Perfect, you're nearly done for the computer prototype. Next, please navigate yourself to the organization screen.

--Perform navigation test
#2--

--Record feedbacks and time
required--

Now, please perform the organization test. Do you have any questions so far?

--Perform organization
test--
--Record feedbacks and time required--

Next, please navigate to the create an event screen.

--Perform navigation test #3--
--Record feedbacks--

Please, fill out the forms on fscreen.

--Perform create an event test--
--Record feedbacks--

Next, please navigate to the “My Files” screen and give it a look around. How do you feel about the interface?

--Perform navigation test #4--
--Record feedbacks--

To conclude off the prototype, please log out of the system.

--Perform log out test--

Perfect! You have now completed all tests. Before you go we would like to ask you to complete one final questionnaire.

--User should complete post-test questionnaire--

That's everything today! Thank you for participating! We hope you had a blast testing our prototype!
